TA212069 "H83A HOW OFTEN FELT NERVOUS IN PAST MO"

H83a. Now I would like to ask you some questions about how you have been feeling in the past month. During the past 30 days, how often did you feel nervous?
 Would you say all of the time, most of the time, some of the time, a little of the time, or none of the time?

This variable is a component of the Non-Specific Psychological Distress-K6 Scale (TA212321). This scale is the sum of all non-missing responses to 6 items, where a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

TA212069	H83a	How Often Felt Nervous in Past Month
TA212070	H83b	How Often Felt Hopeless in Past Month
TA212071	H83c	How Often Felt Restless in Past Month
TA212072	H83d	How Often Felt Everything an Effort in Past Month
TA212073	H83e	How Often Felt Too Sad in Past Month
TA212074	H83f	How Often Felt Worthless in Past Month

To create the scale, the items are rescored as follows:

A response of

'All of the Time' = 4 points

'Most of the Time' = 3 points

'Some of the Time' = 2 points

'A Little of the Time' = 1 point

'None of the Time' = 0 points

The scores are then summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

This variable may be based on fewer than the above six variables. Items containing "don't know" and "refused" responses are not included in the calculation of the scale.

In addition to the K-6 Scale components, item H83g. measures the magnitude of effect on daily life.

This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School.

TA212204 "K9A HOW OFTEN DID SOMETHING DANGEROUS"

K9a. Now please think about the last 6 months.

About how often in those 6 months did you do something you knew was dangerous just for the thrill of it?

Would you say never, once, 2-3 times, 4-6 times, 7-10 times, 11-20 times, or 21 or more times?

This variable is a component of both the Risky Behaviors Scale (TA212324) and Sensation Seeking Scale (TA212325). The Risky Behaviors scale is the average of all non-missing responses to these 5 items. The items are each scored 1-7 where higher scores are indicative of more risk taking:

TA212204	K9a	How Often Did Something Dangerous
TA212206	K9b	How Often Damaged Public Property
TA212207	K9c	How Often Got into Physical Fight
TA212208	K9d	How Often Drove When Drunk or High

TA212383 "SCALE: BODY MASS INDEX"

Body Mass Index

This variable was calculated as follows:

$BMI = [(Weight \text{ in Pounds}) / (Height \text{ in inches}) \times (Height \text{ in inches})] \times 703$

Height and weight values were taken from the following questions:

TA212063	H77.	Weight--Total Pounds
TA212065	H78.	Height--Feet Component
TA212066	H78.	Height--Inches Component

Any extreme results, i.e., BMI of less than 15.0 or greater than 59.9, were recoded to 99, since in such cases the accuracy of height and/or weight values is highly doubtful.

Body mass index (BMI) is a measure of body fat based on height and weight that applies to both adult men and women. BMI categories are:

Normal weight = 18.5-24.9
 Overweight = 25.0-29.9
 Obese = BMI of 30.0 or greater

For more information, see:

TA212393 "URBANICITY"

Beale-Ross Rural-Urban Continuum Code for Residence at the Time of the TA Interview

This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file to qualified users under special contractual arrangements with the PSID; for more information, contact us at PSIDhelp@umich.edu.

These codes are based on matches to the FIPS state and county codes against the 2013 Rural-Urban Continuum Codes published by USDA downloaded from <https://www.ers.usda.gov/data-products/rural-urban-continuum-codes/.aspx>

The 2013 Rural-Urban Continuum Codes form a classification scheme that distinguishes metropolitan counties by the population size of their metro area, and nonmetropolitan counties by degree of urbanization and adjacency to a metro area. The official Office of Management and Budget (OMB) metro and nonmetro categories have been subdivided into three metro and six nonmetro categories. Each county in the U.S. is assigned one of the 9 codes. This scheme allows researchers to break county data into finer residential groups, beyond metro and nonmetro, particularly for the analysis of trends in nonmetro areas that are related to population density and metro influence. The Rural-Urban Continuum Codes were originally developed in 1974. They have been updated each decennial since (1983, 1993, 2003, 2013), and slightly revised in 1988. Note that the 2013 Rural-Urban Continuum Codes are not directly comparable with the codes prior to 2000 because of the new methodology used in developing the 2000 metropolitan areas.

ER35117 "YEAR HIGHEST EDUCATION UPDATED 23"

Year Reference Person/Spouse/Partner or OFUM education updated

As of the 2015 Wave, the education series for Reference Person/Spouse/Partner and OFUMs (aged 16 or older and in the FU last year) are parallel. Thus, we have included these education variables as part of the Individual File although most are also repeated for Reference Persons/Spouses/Partners on the 2023 Family File in the KL background section, as well.

For new Reference Persons/Spouses/Partners and eligible OFUMs, the baseline education series is asked (KL43/G88a - KL61b/G88m). For returning Reference Persons/Spouses/Partners and eligible OFUMs, the education update series (KL84a/G88dd) is asked. If the calculated level of completed education in the update series is higher than previously reported, this variable indicates the year this individual's main education series (KL43/G88a - KL61b/G88m) was updated.

Please note that the baseline education series for eligible OFUMs was first collected in 2013.

ER35152 "YEARS COMPLETED EDUCATION 23"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Reference Persons/Spouses/Partners and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2023 interview.

The values for 2023 Reference Persons/Spouses/Partners are pulled from 2023 family-level data. Beginning in the 2013 Wave, we asked for an education update for our returning Reference Persons/Spouses/Partners. If additional educational attainment was reported, we updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER81026, for Spouses/Partners, and ER81153, for Reference Persons).

The values for 2023 OFUMs are derived as follows: for new Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the main education series (KL43/G88a - KL61b/G88m); for returning Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the updated education series (KL74/G88n - KL83b/G88bb). These data are parallel as of the 2015 Wave.

This variable differs from the family-level variables ER81935 (Reference Person) and ER81936 (Spouse/Partner) in the treatment of Reference Persons and Spouses/Partners who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G88c1 (ER35122) in the treatment of OFUMs who received a GED (G88b1=2) but the value derived from G88c1 is less than 12 years; that is, G88c1 retains the grade completed but the value for this variable is coded as 12.

KL74/G88n. Now I would like to talk about the education (you have/[he/she] has) received. (Have you/has [he/she]) attended regular school since our last interview on (PYIWDATE)? Regular school includes high school and schooling that leads to a college or professional school degree.

The following series (ER35153-ER35187) is the educational update series for Reference Persons/Spouses/Partners and eligible OFUMs. If the calculated educational level derived from the update series is higher than previously reported, we have updated the main educational series (ER35118-ER35152) with this new information. Variable ER35117 indicates the year this series was updated for returning Reference Persons/Spouses/Partners and eligible OFUMs.
