ER30001 "1968 INTERVIEW NUMBER"

1968 Interview Number (1968 ID Number)

This variable is the 1968 family ID number. The combination of this variable and Person Number (ER30002) provides unique identification for each individual on the data file. Individuals associated with families from the Latino and Immigrant samples, added to the PSID in 1990/1992 and 1997/1999, and 2017 respectively, were assigned 1968 IDs so that they, too, have unique identifiers compatible with the PSID structure for the core (SRC and Census) sample.

ER32006 "WHETHER SAMPLE OR NONSAMPLE"

Whether Individual Is Sample

This variable not only indicates persons who were sample members but also flags nonsample members who were designated as followable. Thus far in PSID history, two such nonsample groups exist: nonsample elderly individuals, followed from 1990 through 1995, and nonsample parents of sample children if the children were under age 18, followed from 1994 through 2003.

Initially, the nonsample elderly have person numbers of 170 and higher and were aged 64 or older at the time of the 1989 interview and expected to be at least age 65 by the time of the 1990 interview. In each subsequent wave through 1995, a nonsample individual who was expected to be at least 65 years old by the time of the next interview was added to the group. Refer to Section I, Part 1, of the Guides to the 1990 and subsequent codebooks for further details.

Nonsample parents also have person numbers of 170 or greater. Initially, all such parents were designated in advance of the 1994 interview if any of their sample children were under age 18. These parents were followed until the youngest sample child reached age 25. As births of new sample members occurred from 1994 through 2003, their nonsample parent was made followable.

Beginning in 1994, children who were born since the initial interview for the sample to which they belonged and who carried the "PSID gene", that is, who had at least one sample parent but who did not move into a responding PSID family at birth, were designated moved-in sample members. Such children were assigned person numbers of 170 and higher but have individual weights for years when they are present in the PSID and otherwise fall under all PSID rules for sample members.

Some individuals whose cohort years are 1968, 1997 or 1999 and whose family met similar eligibility criteria to the immigrant refresher sample added in 2017/2019 became sample themselves as of 2019. Those individuals have a value of 4 on this variable.

ER34203 "RELATION TO HEAD

13"

2013 Relationship to Head

Note that these relationships are those to the 2011 Head for any individual whose 2013 sequence number (ER34202) is greater than 50; that is, individual has moved out of the FU. Thus, for example, if the 2011 Head is no longer present at the time of the 2013 interview, his or her relationship to Head is coded 10; the new 2013 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER34202) are coded 01.

TA131217 "MENTAL HEALTH: NON-SPEC PSYCH DISTRESS"

The K-6 Non-Specific Psychological Distress Scale

This scale is constructed using non-missing responses to the following questions:

TA130868	H14a.	How Often Felt Nervous in Past Month
TA130869	H14b.	How Often Felt Hopeless in Past Month
TA130870	H14c.	How Often Felt Restless in Past Month
TA130871	H14d.	How Often Felt Everything an Effort in Past Month
TA130872	H14e.	How Often Felt Too Sad in Past Month
TA130873	H14f.	How Often Felt Worthless in Past Month

The codes for these questions are as follows:

- 1 All of the time
- 2 Most of the time
- 3 Some of the time
- 4 A little of the time
- 5 None of the time

To create the scale, the items are rescored as follows:

A response of

- 'All of the Time' = 4 points,
- 'Most of the Time' = 3 points,
- 'Some of the Time' = 2 points,
- 'A Little of the Time' = 1 point, and
- 'None of the Time' = 0 points.

The scores are then summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

This variable may be based on fewer than the above six variables. Items containing "don't know" and "refused" responses are not included in the calculation of the scale.

This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School.

TA131223 "BODY MASS INDEX"

Body Mass Index

This variable was calculated as follows:

$$\text{BMI} = [(\text{Weight in Pounds}) / (\text{Height in inches}) \times (\text{Height in inches})] \times 703$$

Height and weight values were taken from the following questions:

TA130918 H21. Weight--Total Pounds
 TA130920 H22. Height--Feet Component
 TA130921 H22. Height--Inches Component

Any extreme results, i.e., BMI of less than 15.0 or greater than 59.9, were recoded to 99, since in such cases the accuracy of height and/or weight values is highly doubtful.

Body mass index (BMI) is a measure of body fat based on height and weight that applies to both adult men and women. BMI categories are:

Normal weight = 18.5-24.9
 Overweight = 25.0-29.9
 Obese = BMI of 30.0 or greater

For more information, see:

TA131244 "URBANICITY"

Beale-Ross Rural-Urban Continuum Code for Residence at the Time of the TA Interview

These codes are based on matches to the FIPS state and county codes. However, code values have been increased by one; that is, code 1 here is equivalent to code 0 as originally used by Beale and Ross. Metropolitan status is that announced by the Office of Management and Budget in June 1983, when the current population criteria were first applied to results of the 1980 Census. Adjacency was determined by both physical boundary adjacency and a finding that at least 2 percent of the employed labor force in the nonmetropolitan county commuted to metropolitan central counties.

This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file to qualified users under special contractual arrangements with the PSID; for more information, contact us at PSIDhelp@umich.edu.

ER34303 "RELATION TO HEAD"**15"**

2015 Relationship to Head

Note that these relationships are those to the 2013 Head for any individual whose 2015 sequence number (ER34302) is greater than 50; that is, individual has moved out of the FU. Thus, for example, if the 2013 Head is no longer present at the time of the 2015 interview, his or her relationship to Head is coded 10; the new 2015 Head also is coded 10. Therefore, to select current Heads, the user must select those coded 10 in this variable whose sequence numbers (ER34302) are coded 01.

ER34318 "YEAR HIGHEST EDUCATION UPDATED 15"

Year Head/Spouse/Partner or OFUM education updated

As of the 2015 Wave, the education series for Head/Spouse/Partner and OFUMs (aged 16 or older and in the FU last year) are parallel. Thus, we have included these education variables as part of the Individual File although most are also repeated for Heads/Spouses/Partners on the 2015 Family File in the KL background section, as well.

For new Heads/Spouses/Partners and eligible OFUMs, the baseline education series is asked (KL43/G88a - KL61b/G88m). For returning Heads/Spouses/Partners and eligible OFUMs, the education update series (KL84a/G88dd) is asked. If the calculated level of completed education in the update series is higher than previously reported, this variable indicates the year this individual's main education series (KL43/G88a - KL61b/G88m) was updated.

Please note that the baseline education series for eligible OFUMs was first collected in 2013.

ER34349 "YEARS COMPLETED EDUCATION 15"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Heads/Spouses/Partners and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2015 interview.

The values for 2015 Heads/Spouses/Partners are pulled from 2015 family-level data. Beginning in the 2013 Wave, we asked for an education update for our returning Heads/Spouses/Partners. If additional educational attainment was reported, we updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER64680, for Spouses/Partners, and ER64819, for Heads).

The values for 2015 OFUMs are derived as follows: for new Heads/Spouses/Partners/eligible OFUMs: uses variables that correspond to the main education series (KL43/G88a - KL61b/G88m); for returning Heads/Spouses/Partners/eligible OFUMs: uses variables that correspond to the updated education series (KL74/G88n - KL83b/G88bb). These data are parallel as of the 2015 Wave.

This variable differs from the family-level variables ER65459 (Head) and ER65460 (Spouse/Partner) in the treatment of Heads and Spouses/Partners who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G88c1 (ER34323) in the treatment of OFUMs who received a GED (G88b1=2) but the value derived from G88c1 is less than 12 years; that is, G88c1 retains the grade completed but the value for this variable is coded as 12.

KL74/G88n. Now I would like to talk about the education (you/he/she) has received. [(Have you/ Has (he/she)] attended regular school since our last interview on [PYIWDATE]? Regular school includes high school and schooling that leads to a college or professional school degree.

The following series (ER34350-ER34380) is the educational update series for Heads/Spouses/Partners and eligible OFUMs. If the calculated educational level derived from the update series is higher than previously reported, we have updated the main educational series (ER34319-ER34349) with this new information. Variable ER34318 indicates the year this series was updated for returning Heads/Spouses/Partners and eligible OFUMs.

TA151277 "MENTAL HEALTH: NON-SPEC PSYCH DISTRESS"

The K-6 Non-Specific Psychological Distress Scale

This scale is constructed using non-missing responses to the following questions:

TA150885 H14a. How Often Felt Nervous in Past Month
 TA150886 H14b. How Often Felt Hopeless in Past Month
 TA150887 H14c. How Often Felt Restless in Past Month

 TA150889 H14e. How Often Felt Too Sad in Past Month
 TA150890 H14f. How Often Felt Worthless in Past Month

The codes for these questions are as follows:

1 All of the time
 2 Most of the time
 3 Some of the time
 4 A little of the time
 5 None of the time

To create the scale, the items are rescored as follows:

A response of

'All of the Time' = 4 points,
 'Most of the Time' = 3 points,
 'Some of the Time' = 2 points,
 'A Little of the Time' = 1 point, and
 'None of the Time' = 0 points.

The scores are then summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.

This variable may be based on fewer than the above six variables. Items containing "don't know" and "refused" responses are not included in the calculation of the scale.

This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School.

TA151283 "BODY MASS INDEX"

Body Mass Index

This variable was calculated as follows:

$BMI = [(Weight \text{ in Pounds}) / (Height \text{ in inches}) \times (Height \text{ in inches})] \times 703$

Height and weight values were taken from the following questions:

TA150934 H21. Weight--Total Pounds
 TA150936 H22. Height--Feet Component
 TA150937 H22. Height--Inches Component

Any extreme results, i.e., BMI of less than 15.0 or greater than 59.9, were recoded to 99, since in such cases the accuracy of height and/or weight values is highly doubtful.

Body mass index (BMI) is a measure of body fat based on height and weight that applies to both adult men and women. BMI categories are:

Normal weight = 18.5-24.9
 Overweight = 25.0-29.9
 Obese = BMI of 30.0 or greater

This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file to qualified users under special contractual arrangements with the PSID; for more information, contact us at PSIDhelp@umich.edu.

These codes are based on matches to the FIPS state and county codes against the 2013 Rural-Urban Continuum Codes published by USDA downloaded from <https://www.ers.usda.gov/data-products/rural-urban-continuum-codes/.aspx>

The 2013 Rural-Urban Continuum Codes form a classification scheme that distinguishes metropolitan counties by the population size of their metro area, and nonmetropolitan counties by degree of urbanization and adjacency to a metro area. The official Office of Management and Budget (OMB) metro and nonmetro categories have been subdivided into three metro and six nonmetro categories. Each county in the U.S. is assigned one of the 9 codes. This scheme allows researchers to break county data into finer residential groups, beyond metro and nonmetro, particularly for the analysis of trends in nonmetro areas that are related to population density and metro influence. The Rural-Urban Continuum Codes were originally developed in 1974. They have been updated each decennial since (1983, 1993, 2003, 2013), and slightly revised in 1988. Note that the 2013 Rural-Urban Continuum Codes are not directly comparable with the codes prior to 2000 because of the new methodology used in developing the 2000 metropolitan areas.

ER34517 "YEAR HIGHEST EDUCATION UPDATED 17"

Year Reference Person/Spouse/Partner or OFUM education updated

As of the 2017 Wave, the education series for Reference Person/Spouse/Partner and OFUMs (aged 16 or older and in the FU last year) are parallel. Thus, we have included these education variables as part of the Individual File although most are also repeated for Reference Persons/Spouses/Partners on the 2017 Family File in the KL background section, as well.

For new Reference Persons/Spouses/Partners and eligible OFUMs, the baseline education series is asked (KL43/G88a - KL61b/G88m). For returning Reference Persons/Spouses/Partners and eligible OFUMs, the education update series (KL84a/G88dd) is asked. If the calculated level of completed education in the update series is higher than previously reported, this variable indicates the year this individual's main education series (KL43/G88a - KL61b/G88m) was updated.

Please note that the baseline education series for eligible OFUMs was first collected in 2013.

ER34548 "YEARS COMPLETED EDUCATION 17"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Reference Persons/Spouses/Partners and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2017 interview.

The values for 2017 Reference Persons/Spouses/Partners are pulled from 2017 family-level data. Beginning in the 2013 Wave, we asked for an education update for our returning Reference Persons/Spouses/Partners. If additional educational attainment was reported, we updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER70753, for Spouses/Partners, and ER70891, for Reference Persons).

The values for 2017 OFUMs are derived as follows: for new Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the main education series (KL43/G88a - KL61b/G88m); for returning Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the updated education series (KL74/G88n - KL83b/G88bb). These data are parallel as of the 2015 Wave.

This variable differs from the family-level variables ER71538 (Reference Person) and ER71539 (Spouse/Partner) in the treatment of Reference Persons and Spouses/Partners who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G88c1 (ER34522) in the treatment of OFUMs who received a GED (G88b1=2) but the value derived from G88c1 is less than 12 years; that is, G88c1 retains the grade completed but the value for this variable is coded as 12.

KL74/G88n. Now I would like to talk about the education (you have/[he/she] has) received. (Have you/has [he/she]) attended regular school since our last interview on (PYIWDATE)? Regular school includes high school and schooling that leads to a college or professional school degree.

The following series (ER34549-ER34579) is the educational update series for Reference Persons/Spouses/Partners and eligible OFUMs. If the calculated educational level derived from the update series is higher than previously reported, we have updated the main educational series (ER34518-ER34548) with this new information. Variable ER34517 indicates the year this series was updated for returning Reference Persons/Spouses/Partners and eligible OFUMs.
