TA191961 "H83A HOW OFTEN FELT NERVOUS IN PAST MO"H83a. Now I would like to ask you some questions about how you have been feeling in the past month.
During the past 30 days, how often did you feel nervous?Would you say all of the time, most of the time, some of the time, a little of the time, or none of
the time?

This variable is a component of the Non-Specific Psychological Distress-K6 Scale (TA192155).

This scale is the sum of all non-missing responses to 6 items, where a score of 13 or higher indicates
sensitivity around the threshold for the clinically significant range of the distribution of nonspecific
distress.

TA191962	H83b	How Often Felt Hopeless in Past Month
TA191963	H83c	How Often Felt Restless in Past Month

TA191965	H83e	How Often Felt Too Sad in Past Month
TA191966	H83f	How Often Felt Worthless in Past Month

The codes for these questions are as follows:

1	All of the time
2	Most of the time
3	Some of the time
4	A little of the time
5	None of the time

To create the scale, the items are rescored as follows:

A response of

'All of the Time' = 4 points

'Most of the Time' = 3 points

'Some of the Time' = 2 points

'A Little of the Time' = 1 point

'None of the Time' = 0 points

The scores are then summed; a score of 13 or higher indicates sensitivity around the
threshold for the clinically significant range of the distribution of nonspecific
distress.This variable may be based on fewer than the above six variables. Items containing "don't know" and "refused"
responses are not included in the calculation of the scale.

In addition to the K-6 Scale components, item H83g. measures the magnitude of effect on daily life.

This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School.

TA192066 "K1A HOW OFTEN TREATED W/ LESS COURTESY"

K1a. Now I would like to talk about things that can happen in your day-to-day life. In your day-to-day life, how often have any of the following things happened to you? You are treated with less courtesy than other people.

Would you say this never happens to you, happens less than once a year, a few times a year, a few times a month, at least once a week, or almost every day?

This variable is a component of the Everyday Discrimination Scale (TA192156).

This scale is the average of all non-missing responses to 6 items each scored 1-6, where higher scores are indicative of greater levels of discrimination.

TA192188 "SCALE: BODY MASS INDEX"

Body Mass Index

This variable was calculated as follows:

$$\text{BMI} = [(\text{Weight in Pounds}) / (\text{Height in inches}) \times (\text{Height in inches})] \times 703$$

Height and weight values were taken from the following questions:

TA191949 H77. Weight--Total Pounds
 TA191951 H78. Height--Feet Component
 TA191952 H78. Height--Inches Component

Any extreme results, i.e., BMI of less than 15.0 or greater than 59.9, were recoded to 99, since in such cases the accuracy of height and/or weight values is highly doubtful.

Body mass index (BMI) is a measure of body fat based on height and weight that applies to both adult men and women. BMI categories are:

Normal weight = 18.5-24.9
 Overweight = 25.0-29.9
 Obese = BMI of 30.0 or greater

TA192198 "URBANICITY"

Beale-Ross Rural-Urban Continuum Code for Residence at the Time of the TA Interview

This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file to qualified users under special contractual arrangements with the PSID; for more information, contact us at PSIDhelp@umich.edu.

These codes are based on matches to the FIPS state and county codes against the 2013 Rural-Urban Continuum Codes published by USDA downloaded from <https://www.ers.usda.gov/data-products/rural-urban-continuum-codes/.aspx>

The 2013 Rural-Urban Continuum Codes form a classification scheme that distinguishes metropolitan counties by the population size of their metro area, and nonmetropolitan counties by degree of urbanization and adjacency to a metro area. The official Office of Management and Budget (OMB) metro and nonmetro categories have been subdivided into three metro and six nonmetro categories. Each county in the U.S. is assigned one of the 9 codes. This scheme allows researchers to break county data into finer residential groups, beyond metro and nonmetro, particularly for the analysis of trends in nonmetro areas that are related to population density and metro influence. The Rural-Urban Continuum Codes were originally developed in 1974. They have been updated each decennial since (1983, 1993, 2003, 2013), and slightly revised in 1988. Note that the 2013 Rural-Urban Continuum Codes are not directly comparable with the codes prior to 2000 because of the new methodology used in developing the 2000 metropolitan areas.

ER34917 "YEAR HIGHEST EDUCATION UPDATED 21"

Year Reference Person/Spouse/Partner or OFUM education updated

As of the 2015 Wave, the education series for Reference Person/Spouse/Partner and OFUMs (aged 16 or older and in the FU last year) are parallel. Thus, we have included these education variables as part of the Individual File although most are also repeated for Reference Persons/Spouses/Partners on the 2021 Family File in the KL background section, as well.

For new Reference Persons/Spouses/Partners and eligible OFUMs, the baseline education series is asked (KL43/G88a - KL61b/G88m). For returning Reference Persons/Spouses/Partners and eligible OFUMs, the education update series (KL84a/G88dd) is asked. If the calculated level of completed education in the update series is higher than previously reported, this variable indicates the year this individual's main education series (KL43/G88a - KL61b/G88m) was updated.

Please note that the baseline education series for eligible OFUMs was first collected in 2013.

ER34952 "YEARS COMPLETED EDUCATION 21"

What is the highest grade or year of school that (you/he/she) has completed?

This variable contains values for Reference Persons/Spouses/Partners and OFUMs aged 16 years or older who were in the Family Unit in the prior year.

The values for this variable represent the actual grade of school completed; e.g., a value of 08 indicates that this individual completed the eighth grade by the time of the 2021 interview.

The values for 2021 Reference Persons/Spouses/Partners are pulled from 2021 family-level data. Beginning in the 2013 Wave, we asked for an education update for our returning Reference Persons/Spouses/Partners. If additional educational attainment was reported, we updated their education variables in the background section and reported the year of the education update on the Family file (see variables "Year Highest Education Updated", ER81026, for Spouses/Partners, and ER81153, for Reference Persons).

The values for 2021 OFUMs are derived as follows: for new Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the main education series (KL43/G88a - KL61b/G88m); for returning Reference Persons/Spouses/Partners/eligible OFUMs: uses variables that correspond to the updated education series (KL74/G88n - KL83b/G88bb). These data are parallel as of the 2015 Wave.

This variable differs from the family-level variables ER81935 (Reference Person) and ER81936 (Spouse/Partner) in the treatment of Reference Persons and Spouses/Partners who received a GED but did not attend college. The value for the family-level variable is the grade completed; for this individual-level variable, the value is 12. Similarly, for OFUMs, this variable differs from G88c1 (ER34922) in the treatment of OFUMs who received a GED (G88b1=2) but the value derived from G88c1 is less than 12 years; that is, G88c1 retains the grade completed but the value for this variable is coded as 12.

KL74/G88n. Now I would like to talk about the education (you have/[he/she] has) received. (Have you/has [he/she]) attended regular school since our last interview on (PYIWDATE)? Regular school includes high school and schooling that leads to a college or professional school degree.

The following series (ER34953-ER34987) is the educational update series for Reference Persons/Spouses/Partners and eligible OFUMs. If the calculated educational level derived from the update series is higher than previously reported, we have updated the main educational series (ER34918-ER34952) with this new information. Variable ER34917 indicates the year this series was updated for returning Reference Persons/Spouses/Partners and eligible OFUMs.

Also, data users should note that during data processing we combined codes 6, 7, and 11 in the original data collection instrument into code 12, a new code that combines: Military Health Care/Tricare (Active duty)--code 6; Tricare/Champus/ChampVA (dependents, veterans)--code 7; and Veterans Administration (VA)--code 11.
