Non-comparability Notes Appendix

- F-g** Field widths differ. Truncation of some variables in this list may be necessary. See codebooks.
- F-j** There was a greater possibility of double counting of food subsidies for total food expenditures in earlier years, which was largely eliminated beginning in 1972 with revised question formats. Since 1979 (reflected in 1980 and later years' data), food stamps have cost nothing, so errors should be negligible.
